## VSVU series

### Heavy-duty wheels with Vulkollan® tread, with cast iron wheel centre

700–2,400 kg

**Tread and tyre hardness**

92 Shore A

**Smooth operation / floor preservation**

good

**Rolling resistance**

very good

**Wear resistance**

excellent

**Tread:**

- high-quality polyurethane elastomer Vulkollan®, hardness 92 Shore A
- low rolling resistance
- **high dynamic load capacity**
- high abrasion resistance
- high cut and tear propagation resistance
- colour natural, non-marking, non-staining
- excellent chemical connection with the wheel centre

**Wheel centre:**

- heat-treatable steel
- clamping surface on both sides for mechanical processing

**Other features:**

- please note the following in terms of the mechanical processing of the base wheels:
  1. the temperature of the wheel must not exceed 90 °C
  2. the wheel must be fixed using the clamping surface provided
  3. any change to the tread will reduce the load capacity of the wheel
- high chemical resistance to many aggressive substances
- operating temperature: -30 °C to +70 °C, temporarily up to +90 °C, reduced load capacity over +40 °C
