

# BOX TROLLEY BT-210RS-900x400x1791-VPA

The Box trolley is a special equipment suitable for vertical arrangement of packaged goods, with load capacity up to 200 kg. It is designed according to requirement of customer, for sort and transport in storage facilities of shoe boxes, textile products and accessories. The meshwork areas from three sides protect the load from falling or spilling. The fourth long side is fully open and provide easy access to the content. The bottom of the trolleys is made of particle board. The trolley is extremely maneuverable in tight spaces because of fourth swivel castors. The wheels are made from non-marking gray rubber tread and are suitable for delicate floors.
