

BOX TROLLEY BT-301RS-900x700x1820-LE

The Box trolley is designed for vertical arrangement of packaged goods, with load capacity up to 300 kg. It is produced according to specific requirement of customer for dimensions. It is suitable for sort, transport and storage of shoe boxes, textile products and accessories. It could be used indoor and outdoor. The meshwork areas from three sides protect the load from falling or spilling. The fourth long side is fully open and provide easy access to the content. The bottom of the trolleys is made of particle board. The trolley is maneuverable in tight spaces because of the fourth swivel castors. There are more types of this trolley with different dimensions in our catalogue.
